Diese Leuchte enthält ein
Leuchtmittel der
Energieeffizienzklasse **B**
This luminaire contains a
light source of energy
efficiency class **B**

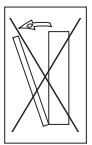

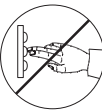

Art.-Nr.: 532514 - 04/2020

Achtung:
Leuchte nicht öffnen!
Garantieverlust!

Attention:
Don't open the luminaire!
Loss of Guarantee!

Atención:
No abrir la luminaria!
Pérdida de garantía!

Allgemeine Sicherheitshinweise

- Montage, Inbetriebnahme und Wartung nur durch Elektrofachkraft.
- Arbeiten Sie nie bei anliegender Spannung an der Leuchte.
- Lebensgefahr durch Stromschlag!
- Elektrischer Anschluss muss ordnungsgemäß, entsprechend allen geltenden Normen und sonstigen nationalen und internationalen Sicherheits- und Unfallverhütungsvorschriften erfolgen.
- Beschädigte Leuchten dürfen nicht betrieben werden.
- Sicherheitshinweise und Montageanleitung beachten und aufbewahren
- Keine Haftung für Schäden durch unsachgemäßen Einsatz.
- Bei Instandsetzung nur Originalteile verwenden.
- Tragfähigkeit der Decke und Befestigungselemente sicherstellen.
- Leuchte ausschließlich für Innenraumeinsatz und Umgebungstemperaturen bis 25°C geeignet, sofern mittels Etikettierung der Leuchte nicht anders beschrieben.

Betrieb der Leuchte

- Ungewöhnliche Dunkelstellen können auf Teilausfall von LED hinweisen. Regelmäßig prüfen und betroffene Leuchten austauschen. Die Lichtquelle (LED) dieser Leuchte darf nicht durch den Anwender ausgetauscht oder ersetzt werden.
- Eine Überschreitung der zulässigen Umgebungstemperatur reduziert die Lebensdauer der Leuchte, im Extremfall droht Frühausfall.
- Die Betauung der Leuchte ist zu vermeiden.
- Jegliche mechanische Belastung der LED Platinen ist unzulässig.
- LED können durch elektrostatische Entladung (ESD) geschädigt werden, bis hin zum Totalausfall. Direkte Berührung ist stets zu vermeiden.
- In Abhängigkeit von deren Konzentration können Chemikalien die LED-Module angreifen und zu Lichtstromreduktion, Drift der Lichtfarbe bzw. Totalausfall führen. Direkter Kontakt mit Säuren, Laugen, Lösemitteln, flüchtigen organischen Verbindungen bzw. Ölen ist stets zu vermeiden. Um Schäden durch Ausgasungen zu vermeiden, ist eine ausreichende Be- und Entlüftung zu gewährleisten.
- Zur Vermeidung von EMV-Problemen Durchgangsverdrahtung nicht unmittelbar entlang der Leuchtenverdrahtung führen.
- Steuereingänge von dimmbaren Leuchten mit handelsüblichen für Netzspannung geeigneten Leitungen anschließen.

Änderungen unserer Produkte

Veränderung, Umarbeitung, Umkennzeichnung von Produkten können deren technische Eigenschaften negativ beeinflussen, diese zerstören und möglicherweise Folgeschäden an anderen Objekten verursachen. Für durch derartige Änderungen verursachte Schäden kann der Hersteller nicht verantwortlich gemacht werden.

▽+ IP5x - nicht leitfähiger Staub

▽+ IP6x - leitfähiger und nicht leitfähiger Staub

General Safety Information

- Installation, commissioning and maintenance only by qualified electrician.
- Never perform any work on the luminaire with voltage applied. Danger to life due to electric shock!
- Electric connection must be appropriate according to all applicable standards and other national and international safety and accident prevention regulations.
- Damaged luminaires must not be operated.
- Observe and retain safety instructions and mounting instructions
- No liability is accepted for damages resulting from improper use.
- Use genuine parts only for repair.
- Ensure stability of the ceiling and fastening elements.
- The luminaire is exclusively intended for interior rooms and ambient temperatures not exceeding 25°C, unless otherwise described by labeling the luminaire.

Operation of the luminaire

- Abnormal dark spots may be an indication of partial failure of LEDs. Inspect regularly and replace the luminaires affected. The light source (LED) of this luminaire must not be exchanged or replaced by the user.
- Exceeding the permissible ambient temperature will reduce the luminaire's lifecycle, resulting in premature failure in extreme cases.
- Avoid condensation of the luminaire.
- Any mechanical load to the LED circuit boards is not permitted.
- LEDs can be damaged by electrostatic discharge (ESD). This may result in total failure. Always avoid direct contact.
- Depending on their concentration, chemicals can corrode the LED modules and lead to reduction of luminous flux, drift of luminous colour and/or total failure. Always avoid direct contact with acids, bases, solvents, volatile organic compounds and/or oils. Ensure sufficient ventilation to prevent damage by gas release.
- Avoid ESD problems by not routing feed-through wiring directly along the wiring of the luminaire.
- Connect control inputs of dimmable luminaires with standard cables suitable for power supply voltage.

Changes to our products

Modification, reworking, re-marking of products can have a negative impact on their technical properties, destroy them and possibly cause consequential damage to other objects. The manufacturer cannot be held responsible for damage caused by such changes.

▽+ IP5x - dust nonconductive

▽+ IP6x - dust conductive and dust nonconductive

Consignes générales de sécurité

- Montage, mise en service et maintenance uniquement par un électricien spécialisé.
- Ne travaillez jamais sur un luminaire sous tension. Danger de mort par choc électrique !
- Le branchement électrique doit être réalisé de manière correcte et conforme à toutes les normes en vigueur et autres prescriptions nationales et internationales relatives à la sécurité et à la prévention des accidents.
- Ne pas faire fonctionner de luminaires défectueux.
- Respecter et conserver les consignes de sécurité et les instructions de montage
- Nous déclinons toute responsabilité en cas de dommages dus à une utilisation incorrecte.
- Utiliser uniquement des pièces d'origine pour la réparation.
- Veiller à ce que la capacité portante du plafond et des éléments de fixation soit suffisante.
- Sauf indication contraire indiquée sur l'étiquette du luminaire, luminaire conçu uniquement pour une utilisation en intérieur et une température ambiante maximale de 25 °C.

Fonctionnement du luminaire

- Des zones d'ombre inhabituelles peuvent indiquer une défaillance partielle des LED. Contrôler régulièrement et remplacer les luminaires concernés. Utilisateur n'est pas autorisé à échanger ou à remplacer la source de lumière (LED) de ce luminaire.
- Le dépassement des températures ambiantes admissibles réduit la longévité du luminaire; dans les cas extrêmes, cela peut entraîner des pannes prématurées.
- Éviter toute condensation sur le luminaire.
- Ne jamais soumettre les platines à LED à des charges mécaniques.
- Les décharges électrostatiques (DES) peuvent endommager les LED et entraîner leur destruction totale. Toujours éviter le contact direct.
- En fonction de leur concentration, les produits chimiques peuvent attaquer les modules à LED et entraîner une baisse du flux lumineux, une dérive de la température de couleur voire une panne totale. Toujours éviter le contact direct avec les acides, les lessives alcalines, les solvants, les composés et huiles organiques volatils. Assurer une ventilation et une aération suffisantes pour éviter les dégâts dus aux dégagements de gaz.
- Pour éviter les problèmes de CEM, ne pas poser le câblage de liaison directement à côté du câblage du luminaire.
- Brancher les entrées de commande des luminaires à gradation à l'aide de câbles standard adaptés à la tension secteur.

Modification de nos produits

La modification, la transformation et la modification de marquage des produits peuvent avoir une influence négative sur leurs propriétés techniques, détériorer les produits et causer des dommages indirects sur d'autres objets. Le fabricant ne saurait être tenu responsable des dommages causés par ces modifications.

Zasady bezpieczeństwa

PL

Advertencias de seguridad generales

- El montaje, la puesta en funcionamiento y el mantenimiento deberán ser realizados exclusivamente por electricistas profesionales.
- No realice nunca trabajos en la luminaria cuando esta esté sometida a tensión. ¡Peligro de muerte por descarga eléctrica!
- La conexión eléctrica se debe realizar de modo reglamentario, de conformidad con todas las normas vigentes y con las demás prescripciones nacionales e internacionales de seguridad y prevención de accidentes.
- Tenga en cuenta las advertencias de seguridad y las instrucciones de montaje y conserve los documentos correspondientes como referencia.
- No se asume ninguna responsabilidad por daños debidos a un uso antirreglamentario.
- Al hacer reparaciones, utilice exclusivamente piezas originales.
- Asegúrese de que el techo y los elementos de fijación tengan la capacidad de carga suficiente.
- A menos que se describa lo contrario etiquetando la luminaria, la luminaria es apta exclusivamente para su uso en interiores y a una temperatura ambiente de hasta 25 °C.

Funcionamiento de la luminaria

- La aparición de puntos oscuros inusuales puede ser indicio de la avería de algunos ledes. Realice revisiones periódicas y sustituya las luminarias defectuosas.
- El rebase de la temperatura ambiente permitida conlleva una reducción de la vida útil de la luminaria y, en casos extremos, el riesgo de una avería prematura.
- Se debe evitar la condensación en la luminaria.
- Está prohibida toda carga mecánica sobre las pletinas de los ledes.
- Una descarga electrostática podría provocar daños en los ledes e incluso una avería total. Se deberá evitar siempre el contacto directo con estos.
- Según su grado de concentración, los productos químicos pueden atacar los módulos de ledes y provocar una reducción del flujo luminoso, alteraciones en el tono de la luz o una avería total. Se debe evitar bajo cualquier circunstancia el contacto directo con ácidos, lejías, disolventes, compuestos orgánicos volátiles o aceites. Para evitar daños debidos a las emisiones de gas, es necesario garantizar una ventilación suficiente de entrada y salida.
- Para evitar problemas de compatibilidad electromagnética, no tienda los cables de paso junto a los cables de la luminaria.
- Conecte las entradas de mando de luminarias atenuables mediante cables convencionales adecuados para tensión de red.

Avvertenze generali sulla sicurezza

- Il montaggio, l'impiego e la manutenzione devono essere eseguiti solo da un elettricista specializzato.
- Non lavorare mai sulla lampada con tensione elettrica inserita. Pericolo di morte a causa di scossa elettrica!
- L'allacciamento elettrico deve essere eseguito a regola d'arte, in conformità a tutte le norme vigenti, alle disposizioni nazionali e internazionali di sicurezza e alle normative antinfortunistiche.
- Le lampade danneggiate non devono essere utilizzate ulteriormente.
- Osservare e conservare le avvertenze di sicurezza e le istruzioni di montaggio.
- Non ci assumiamo alcuna responsabilità per eventuali danni dovuti a un impiego non appropriato.
- Per le riparazioni utilizzare solo parti di ricambio originali.
- Verificare la portata del soffitto e degli elementi di fissaggio.
- La lampada è prevista solo per uso interno e temperature ambiente fino a 25 °C, se non diversamente descritto dall'etichettatura dell'apparecchio.

Funcionamiento della lampada

- Punti scuri insoliti possono indicare un guasto parziale dei LED. Controllare regolarmente e sostituire le lampade in questione.
- Il superamento della temperatura ambiente consentita riduce la durata utile della lampada, in casi estremi si rischia un guasto precoce.
- Evitare la condensazione della lampada.
- È vietata qualsiasi sollecitazione meccanica delle schede LED.
- I LED possono essere danneggiati dalle scariche elettrostatiche (ESD), con possibilità di guasto totale. Si deve sempre evitare il contatto diretto.
- In rapporto alla loro concentrazione, le sostanze chimiche possono aggredire i moduli LED provocando la riduzione del flusso luminoso, la deriva del colore della luce o un guasto totale. Si deve sempre evitare il contatto diretto con acidi, basi, solventi, composti organici volatili o oli. Per evitare danni da emissioni di gas, si deve garantire una sufficiente ventilazione e disaerazione.
- Per evitare problemi di CEM, il cablaggio di transito non deve essere posato direttamente insieme al cablaggio della lampada.
- Collegare gli ingressi di comando delle lampade dimmerabili (varialuce) usando dei cavi adeguati per la tensione di rete.

Modificaciones de nuestros productos

Modifiche, conversioni, cambi dell'etichettatura apportati ai prodotti possono influenzare negativamente le loro proprietà tecniche, distruggerli ed eventualmente causare danni ad altri oggetti. Il produttore non può essere ritenuto responsabile di eventuali danni causati da tali modifiche.

▽ + IP6x - polvere conduttiva e non conduttiva

Ogólne zasady bezpieczeństwa

- Prace związane z montażem, uruchomieniem i konserwacją może wykonywać tylko elektryk.
- Nigdy nie wykonywać prac przy awarii, gdy znajduje się ona pod napięciem. Niebezpieczeństwo dla życia z powodu porażenia prądem!
- Przyłącze elektryczne musi być wykonane profesjonalnie, zgodnie ze wszystkimi obowiązującymi normami oraz innymi krajowymi i międzynarodowymi przepisami bezpieczeństwa i zapobiegania wypadkom.
- Przestrzegać zasad bezpieczeństwa i wytycznych instrukcji montażu oraz zachować je do późniejszego użytku.
- Producent nie ponosi odpowiedzialności za nieprawidłowe stosowanie.
- W przypadku naprawy używać tylko oryginalnych części.
- Zapewnić nośność sufitu i elementów mocujących.
- Oprawa przeznaczona jest wyłącznie do stosowania w pomieszczeniach w temperaturach otoczenia do 25 °C, o ile nie opisano inaczej, oznaczając oprawę.

Eksploatacja oprawy

- Nietypowe zaciemnienie miejsca mogą wskazywać na częściową awarię oprawy LED. Należy regularnie dokonywać kontroli i wymieniać uszkodzone oprawy.
- Przekroczenie dopuszczalnej temperatury otoczenia skracza trwałość oprawy, w skrajnym przypadku grozi przedwczesną awarią.
- Unikać obroszenia oprawy.
- Niedopuszczalne jest jakiegokolwiek obciążenie mechaniczne płytek LED.
- Diody LED mogą ulec uszkodzeniu wskutek wylądowania elektrostatycznego (ESD), a nawet ulec całkowitej awarii. Zawsze należy unikać bezpośredniego kontaktu.
- W zależności od stężenia chemikalia mogą uszkodzić moduły LED i prowadzić do obniżenia strumienia światła, zmiany barwy światła lub całkowitej awarii. Zawsze należy unikać bezpośredniego kontaktu z kwasami, ługami, rozpuszczalnikami, lotnymi związkami organicznymi lub olejami. Celem uniknięcia szkód z powodu emisji gazów należy zapewnić odpowiednią wentylację i odpowietrzanie.
- Aby uniknąć problemów EMC, nie prowadzić okablowania przelotowego bezpośrednio wzdłuż okablowania oprawy.
- Wejścia sterujące opraw z funkcją ściemniania podłączając za pomocą dostępnych powszechnie w sprzedaży przewodów odpowiednich od napięcia sieciowego.

Zmiany naszych produktów

Zmiany, przeróbki, modyfikacja oznaczeń produktów mogą mieć negatywny wpływ na ich parametry techniczne, spowodować ich awarię, a także być możliwą przyczyną powstania szkód następczych w innych obiektach. Producent nie odpowiada za szkody spowodowane tego typu modyfikacjami.
